#### Quicksort in C

```
// von rosettacode.org
    void quick_sort (int *a, int n) {
        int i, j, p, t;
        if (n < 2)
            return;
        p = a[n / 2];
        for (i = 0, j = n - 1;; i++, j--) {
            while (a[i] < p)
                 i++:
            while (p < a[j])
10
                j--;
11
            if (i >= j)
12
                break;
13
           t = a[i];
14
            a[i] = a[j];
15
            a[i] = t;
16
17
        quick_sort(a, i);
18
        quick_sort(a + i, n - i);
19
    }
20
